COURSE DESCRIPTION

As an **American Academy of Sleep Medicine Accredited ASTEP Introductory Course Provider**, this technical certificate program includes 2 portions: 1) an 80-hour program (**American Academy of Sleep Medicine Accredited ASTEP Introductory Course**) that is composed of didactic and some clinical instruction followed by 2) an additional 400 hours of clinical experience in an Accredited Sleep Center. **Total hours = 480 hours.**

It is designed to prepare the student to become Certified as a Polysomnographic Technician which is rapidly becoming the minimal criterion to work as a sleep tech in a Sleep Disorders Center. Graduates of the program will be able to better communicate and interact effectively with sleep disorder patients. Students are trained in the physical and physiological aspects of sleep disorders, familiarity with the different sleep disorders, application of monitoring electrodes utilizing the 10-20 International System as well as other ancillary monitoring equipment, calibrate monitoring equipment, and utilize proper montage and protocol used during polysomnographic studies.

Student progress through the 400 hour Clinical Externship will be monitored weekly. Initially the student will be expected to perform hook-up of 1 patient per night under the direction of an RPSGT or CPSGT. An additional 1 or 2 patients may be assigned to the student during the latter portion of the Externship. Graduates of the program are required to be able to prepare 2 or 3 patients for testing and successfully perform polysomnographic studies, have familiarity with EKG and EEG abnormalities and the use of proper documentation and note taking, have a good understanding and be able to administer CPAP, BiPAP, Auto-set PAP and oxygen (O₂) therapy. Additionally, the student is expected to complete the online modules or equivalent required for sitting for the CPSGT examination offered by the Board of Registered Polysomnographic Technologists (www.brpt.org). There will be exposure to scoring of sleep studies, this is performed during the Clinical Externship portion of the Program. The school participates in the AASM Inter-Scorer Reliability Program and the student has opportunity to learn scoring rules and practice scoring of polysomnographic records.

OBJECTIVES

Upon completing this course, the student will be able to:

- Fluency in sleep terminology and become familiar with various paperwork, orders, HIPPA regulations.
- Demonstrate basic knowledge of chronobiology, “normal sleep”, and common sleep related disease states seen in the sleep lab.
- Understand safety in the lab including medical emergencies
- Learn the International 10-20 System and tabulate various sleep parameters
- Identify neurological, pulmonary, cardiologic, & muscular events of sleep.
- Demonstrate knowledge and comprehension of the various treatment interventions at the sleep lab.
- Demonstrate understanding of Positive Airway Pressure Titration techniques and interfaces.
- Demonstrate knowledge and comprehension of indication for MSLT/ MWT.
- Describe Psychiatric and Behavioral Sleep Related Disorders
- Describe and demonstrate knowledge and comprehension of sleep-related problems in children

WHO SHOULD ATTEND

Anyone with interest in the sleep field and becoming a Polysomnographic Technician / Technologist, existing Polysomnographic Technicians who desire more formal training in the field, Respiratory Therapists, EEG technicians and nurses who desire additional skills. Class limited to first 4 persons who register. Program Director reserves the right to refuse admission to any individual applicant. Program Director also reserves the right to deny a certificate of completion to any participant not attending the entire course. **Completion of this course does not designate “automatic” ability to sit for the Board Registry or Certification for Polysomnographic Technologists, or for the American Board of Sleep Medicine Sleep Technologists Registry Examination (see www.brpt.org) and / or www.absm.org) for details. Criteria from these Boards changes from time to time and their websites should be viewed.**

PREREQUISITES

High School diploma or GED, 17 years or older. – **A copy of your diploma is required with application**

TUITION

The tuition of \$12000 includes all lectures, practical exercises., & oversight during clinicals. Course materials, lab fees, testing and online modules are separate. Fees can be paid by cash, check, or credit card and should be received prior to course date. Tuition includes a \$500 non-refundable administrative fee.
